Overview

Grove is an international leading Information Technology Solutions Company based in India with its branches in different parts of the world. This public limited company was founded in 2004, since inception Grove has been catering to the IT needs of many clients globally to their fullest satisfaction. With a team of experts conversant with the latest in business solution development, Grove has made itself a force to reckon with, in the Information Technology Solutions space. Grove was setup with a view to become an established player in the System Integration & Application development space. By having a proven ERP among its product portfolio catering different industry verticals, Grove has certainly established its credentials in being a reliable service provider.

Grove works by understanding the client's needs. Based on the need, it customizes its offerings or creates an apt product/service-mix to help the client gainfully leverage the right solution from those available. The company provides vendor-free IT consultancy to its clients giving them complete freedom over the IT environment they execute. Grove assists High technology companies to deliver to the market top quality products on schedule on budget. Grove follows structured best practice methodologies formulated from years of working experience with global companies

Grove is the only company in India that initiates its IT offerings that would make economic-sense to small and medium enterprises. Hence, all its products, services and offerings are cost-effective, scalable and relevant. Positioning the delivery model on the importance of business-continuity the company implements IT solutions by causing minimum upheaval in business structures. Grove Also provides world class off-shore and onsite software services.

Mission

“ We are inspired and motivated to provide cost effective innovative services by incorporating optimized and futuristic business solutions with cutting edge technology thereby creating a satisfied, loyal clientele.
